

FOR STALL HOLDERS & FOOD & DRINK VENDORS

What is 'Waste Wise'?

Managing the waste we create at special events like this one, in an environmentally friendly and socially responsible way!

Did you know things have changed?

Community expectations about waste minimisation are driving change through Council resulting in new regulations for all participants involved in special events. Participants include Council, Event Coordinators, waste contractors, sponsors, visitors and YOU.

So what's new?

Sydney's inner west Councils now have an:

- Event Waste Minimisation & Management Policy; and
 - Event Waste Management Plan.
- Event Coordinators need to outline the types and amounts of materials expected on the day and how they will be managed. **All events must be "waste wise" to meet Council approval.**

How this affects YOU

The Event Coordinator will need your assistance to complete the Waste Management Plan for Council. You will be required to:

1. Communicate with the Event Coordinator or Council.
2. **Bring "Accepted" packaging material only** to the event as shown here in the table.
3. Provide a list of the types of material you will be bringing on site.
4. Estimate the approximate quantities of each material type

(See Activity Wastes - Summary Sheet p6)

What if I don't want to participate?

Council and the Event Coordinator require you to comply with these new waste wise guidelines. **If you choose not to, you will not be able to register your stall at this event, or possibly in this Council area again.**

Who can help you?

The Event Coordinator is responsible for supplying you with helpful information on alternative packaging and the waste and recycling system on the day (See Fact Sheet 2).

How to be waste wise

Managing waste wisely includes:

- **Avoiding** certain materials like unwanted packaging in setting up your stall but also in on-selling your product to the consumer;
- **Reusing** products where possible such as the containers, boxes and bags you've used to transport food, drink, clothes and other items; and
- **Recycling** materials including bulk cardboard, glass and plastics generated at your stall.

Event Packaging Material Guide

Accepted	Not Accepted
Paper & cardboard	Polystyrene
Metal, ceramic or compostable foodware eg paper, cardboard, starch	Plastic foodware (cups, plates, cutlery, straws etc)
PET / HDPE plastics (no. 1 & 2)	Composite materials (mixes of materials)
